Summary

Tech-driven Frontend Developer with 2+ years of practical knowledge in coding / designing web applications and interfaces.

With work-ready proficiency in HTML5, JavaScript and CSS, I have built applications and websites using Flutter, React & Bootstrap. Also equipped with working knowledge of Versions control system (GIT), Wordpress and UX / UI Designing, I am capable of handling project lifecycles from conceptualization to rollout.

I am eager to use my skills and strengths to build and develop software solutions in an environment that helps me advance in my career by building my skills with practical and relevant industry experience.
